

The UN Regulation R-118.03 sets in point 6.2.8. an exemption from applying the burning behaviour tests according the Annexes 6 to 8 to the parts made of metal or glass.

**6.2.8. Materials which are not required to undergo the tests described in Annexes 6 to 8 are:**

**6.2.8.1. Parts made of metal or glass**

The question that we want to ask you is:

BMFE-Position on the subject

- a) point 6.2.8 also excludes the application of Annexes 6 to 8 to plastic glasses
- b) point 6.2.8 does not excludes the application of Annexes 6 to 8 to plastic glasses

UN R-43 provides that all plastic glazing must fulfill the tests in annex 15 regarding fire resistance test. This test (horizontal combustion rate) is the same as that defined in Annex 6 to UN R-118 but with the requirement that the horizontal burning rate must be less than 110 mm/min.
