

IG GTR9-PH2 (TF-RUCC)

Task Force: Review and Update Certification Corridors

18 Nov. 2011
Japan

Background

- Flex-GTR has three component level and two assembly level certification tests.
- Certification corridors for those tests were developed on the basis of Flex-TEG discussions.
- Before accepting those corridors by IG GTR-PH2, detailed reviews and updates if needed by task force group are required as requested by the IG GTR-PH2 at its constitutional meeting.

Certification Tests		Certification Corridors	Actions
Component level	Tibia	GRSP-2011-14 (ref. ESV 09-0146, TEG-133)	Review and Update if needed.
	Femur	GRSP-2011-14 (ref. ESV 09-0146, TEG-133)	Review and Update if needed.
	Knee	GRSP-2011-14 (ref. ESV 09-0146)	Review and Update if needed.
Assembly level	Pendulum	GRSP-2011-14 (ref. TEG-120)	Review and Update if needed.
	Inverse	GRSP-2011-14 (ref. TEG-119)	Review and Update if needed.

Objective

- Review and Update Certification Corridors if needed

Chair

- Japan
