

VMAD-SG1 (scenario)

December 10th, 2020 (12:30–14:30 CET)

Prepared by SG1 leader

Shumpei MIYAZAKI (MLIT, Japan)

1. Introduction and way forward

→ Agree upon principle and procedure

2. Functional scenario proposals

① Netherland (RDW) 12:45-13:10

② China (CATARC) 13:10-13:35

③ Japan (MLIT/NTSEL) 13:35-14:00

④ SAFE 14:00-14:25

→ Presentation and questions

3. Any other business

→ No issues at this moment

[Background]

SG1 is requested about developing functional scenarios within divided highway from VMAD-IWG (listed in the “outstanding issues” list).

SG1 requested functional scenario proposals to SG1 members and also whole VMAD members by 7th December.

By 7th, **4 proposals were submitted by SAFE, Netherland, China and Japan.**

(Thank you for your contributions!!)

The purposes of developing highway functional scenarios are

- Confirm whether NATM Master document (NATM MD) is appropriate
- Move forward the scenario discussion because “devil will be even more in the details”

[Today]

Presentation of proposals will be done by proposers.

There will be question time after the presentation.

The maximum time limitation will be 25 minutes by each proposal including questions.

(SG1 leader will interrupt the discussion when the time is over in order to cover all presentations during today’s meeting. Additional questions can be made by e-mail to the presenter after this meeting.)

[Background]

SG1 is requested about developing functional scenarios within divided highway from VMAD-IWG (listed in the “outstanding issues” list).

The result of this discussion will be reflected to NATM Master document (NATM MD), which will be agreed in VMAD-IWG level at 14,15th January, GRVA level at the 1-5th February, and WP29 level at March.

It is required that NATM MD text proposal should be ready at SG1 level before next VMAD-IWG (14,15th January).

[SG1 leader proposal]

SG1 leader would like to agree following principles and procedure.

- Functional scenarios can be added anytime if SG1 discussed and agreed.
- If you have any objection to proposals, counter proposals are highly required. (Negative comments do not move the functional scenario development forward. Feasibility is important.)
- Text proposals for NATM MD will be based on functional scenario proposals by now with taking comments into consideration. (Overlapping will be treated adequately with consultation among functional scenario proposers.)
- Text proposals for NATM MD will be discussed at SG1 meeting on 13th January(13:00-14:30 CET) (Text proposals for NATM MD will be shared to SG1 members before this meeting).
