# **VMAD**

## **Subgroup 4: Test track- / Real world testing**

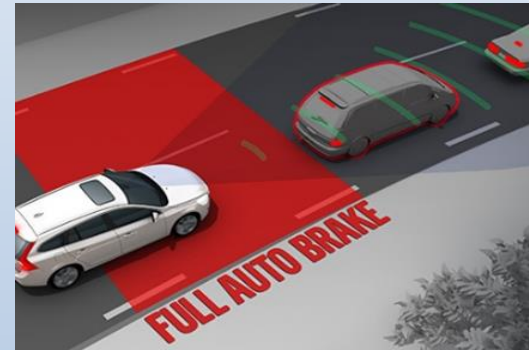

VMAD Webex meeting 24 March 2021

**UNECE**

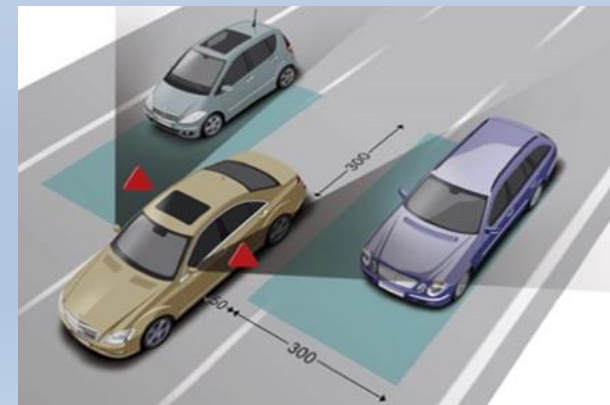

# SG 4's Outstanding issues

- Delivery Master Document (NATM) to GRVA
- Sections 7 and 8: Track- and RWT
- Based on outcomes SG 4's Concept paper
- First Outstanding issue:
  - Identification best practices/procedures;
  - Identification technical resources/tools to be developed
  - Supporting elements of the methodology (e.g. scenarios from SG 1)

# Current Status Outstanding Issue 1:

- Inventory by small working group within SG 4
- Compiled to document containing:
  - Overview best practices and procedures for Track- and RWT
  - Technical resources and tools available + list available supporting components methodology
  - Final section: overview considerations and elements still missing
- Progress:
  - Document sent to small working group
  - After return comments: forwarded to SG 4
  - SG 4 meeting; missing parts... (April/May)
  - Delivery to Co-chairs / VMAD (May)

# How to continue...

- After delivery Outstanding issues to VMAD (ultimately May)
- Start development missing issues / try-outs
- Human factor....
- And following next steps workplan SG 4 as presented (from May onwards)
