

EVS water immersion ad- hoc meeting report

2021.10

EVS water immersion meeting report

- Date: Sep 28th, 2021
- Participants: China, Russia, Korea
- Contents:
 - China introduced proposed draft on water immersion test;
 - Korea proposed venting requirement after water immersion test.
- Discussion:
 - IPX7 as an option requirements for battery
 - Russia approved this option;
 - Korea proposed venting requirement instead of IPX7.
 - The DUT shall be a battery pack or system which has passed the vibration test
 - Korea consider that water immersion test is a safety test, not a durability test.
