

Proposal for a corrigendum to ECE/TRANS/WP29/2022/84

Compared to document ECE/TRANS/WP.29/2022/84, only a new paragraph 11.13. is added to the transitional provisions of this UN Regulation.

I. Proposal

Add a new paragraph 11.13. to read:

“11.13. Supplement 7 (in particular, but not limited to Appendices 2 and 3 to Annex 3 and Annex 9) does not apply to existing type approvals, originally granted prior to the date of entry into force of Supplement 7.”

II. Justification

1. France, Germany, Norway and OICA detected a need for editorial changes in document ECE/TRANS/WP.29/2022/84. Right from the start the introduction of refined and improved measurement methods in the test procedure with Supplement 7 has been targeting new type approvals only.

2. The application of Supplement 7 to existing type approvals granted according to the test procedure of Supplement 6 will create a burden to Contracting Parties and industry that will need to update all existing type approvals with new measurements at the date of entry into force. As the new correction factors will lead to different type approval results, this cannot be retroactively applied to existing approvals.
