

Informal Working Group on  
Intelligent Transport Systems

## **Activities of the secretariat to update the ITS publication (2012)**

Proposal to the Group to incorporate ongoing ITS activities into the revised publication

# Proposal to the Group to incorporate ongoing ITS activities into the revised publication

UNECE

- The secretariat is revising the publication “Intelligent Transport Systems for sustainable Mobility”, issued in 2012<sup>1</sup>
- The aim of the update is to reflect technical progress and also the recent UNECE activities related to ITS
- There is the opportunity to use this publication to document the outcomes of the webinars on ITS

<sup>1</sup><https://unece.org/transport/publications/intelligent-transport-systems-its-sustainable-mobility>

# Brief overview: Intelligent Transport Systems for sustainable mobility (2012)

UNECE

The publication is structured in three parts:

**1) Background Document**

**2) Strategic Note**

**3) Road Map on ITS**

# Brief overview: Intelligent Transport Systems for sustainable mobility (2012)

UNECE

The publication is structured in three parts:

## 1) **Background Document**

- Definitions of Intelligent Transport Systems
- Overview of latest ITS technologies at that time (e.g. Pre-trip traffic information systems, VMS, AEBS, FCWS, LDWS, Driver Monitoring, ESC, Digital Tachograph)
- Benefits and challenges in the promotion of ITS
- Activities of UNECE related to ITS

## 2) **Strategic Note**

- Benefits and stumbling blocks in the ITS deployment
- Why it is not adequately addressed on the policy agenda
- UNECE's vision for ITS (e.g. special role of V2X)

## 3) **Road Map on ITS**

- Tool guiding UNECE activities on ITS
- Recently revised by ITC

# Questions to the Group

UNECE

- 1) Should the publication include the outcomes of the webinars?**
- 2) Does the IWG on ITS want to play a role in the revision of this publication?**

**Informal Working Group on  
Intelligent Transport Systems**

**Thank you!**
