

2.2 "Vehicle type with regard to its Direct Vision" means vehicles which do not differ in such essential respects as:

- (a) The manufacturer's trade name or mark;
- (b) The dimensions and shapes of the components of the vehicle structure situated in front of a vertical plane positioned 1000mm behind the driver's eye point (E2) and perpendicular to the longitudinal plane of the vehicle;
- (c) The distance in the X axis between the ~~centre of the front axle~~ Accelerator Heel Point of the vehicle and the foremost point of the vehicle;
- (d) The number, size, shape or location of transparent areas of the vehicle situated in front of a vertical plane positioned 1,000 mm behind the driver's eye point (E2) and perpendicular to the longitudinal plane of the vehicle;
- (e) The direct vision level, as defined by the table in Annex 5, that the vehicle will fall into.
