Proposal to amend the draft FRAV interim submission to GRVA/WP.29

Modifications to the existing text are marked in **bold** for new or ~~strikethrough~~ for deleted characters.

    1.7.9.   **Additional ADS Capabilities:** Safe use of ADS and ADS vehicles

    1.7.**9.1**.   **In addition to DDT-specific functions,** an ADS ~~function~~ **may require capabilities that** contribute to ensuring the safe operational state of the ADS and/or preventing use when the ADS is not in a safe operational state.

Justification

Para. 1.7.9., This heading preserves the separate treatment of these capabilities without calling them functions, which would be contrary to definition of "function" (*"(ADS) function"* means an ADS hardware and software capability designed to perform a specific portion of the DDT.)

Para. 1.7.4.. is moved and revised under this heading (as noted in FRAV-33-09). The additional text aligns with this heading and differentiation of ADS functions as defined in the document from other capabilities.
