

JAPAN Positions on SG/TF necessity

Proposed Sub-Groups and/or Task Forces	Who is the leader?	Main participant (CPs & NGOs)	Outputs	Until when	Profits	Concerns
NONE (as a first step, determine the common consensus* directly under the IWG)	NA	NA	NA	approximately by the end of 2023	<ul style="list-style-type: none"> • avoid the inconsistency between each phase / each electricity source • effective process as a result 	
SUPPORT** (after developed the common consensus*)	at later stage	at later stage	according to the common consensus agreed by IWG	after common consensus stage to the end of 2024	accelerate the activities with highly skilled experts	

* : e.g. product category, components, system boundary, data quality criteria, collection method, exception criteria,

** : no preference per phase basis or electricity source basis at this moment

Time Schedule (image)

2023	2024	2025			
		1	3	6	11
Common consensus stage (no SG/TF is necessary)	SG activities	ID	WD	GRPE	WP.29
		Drafting		Finalization	

Reflection to ToR

propose to delete [initial working structure and organization will be determined during 2nd IWG meeting on 6th December, 2022]

<Justification>

current text (The IWG on A-LCA could consider creating subgroups or taskforces ...) is well in line with Japan proposal.
