JAPAN AUTOMOBILE STANDARDS INTERNATIONALIZATION CENTER

Size • LI/SS		Note
155/65R14	75H	Summer
	75H	3PMSF
205/55R16	94V	Summer
	91V	Summer
	94H	3PMSF
235/55R19	101Y	Summer
	105Y	Summer
	105W	3PMSF

- ✓ For A segment, we propose 155/65R14, summer tyre and winter tyre.
155/65R14 is the most volume sale size for Japanese light car. (called Kei-car / mini-car)
- ✓ To study the correlation of the test methods and alignment with other test centers, below items need to be considered;
 - Tyre size with smaller LI to confirm wider range of LI
 - Comparison between Normal road vs Extra Load to confirm the effect of inflation pressure difference
