# User group approach

Steps to reach the deliverable on User Safety section for the FRAV April meeting

DRAFT-document

OICA, ETSC, NL

# Procedural steps

- Share documents and points of view
  - Use the -06 document
  - Clearify how generic principles are brought to concrete requirements
  - Explore use-cases/roles and relevant requirements/recommedations
  - HMI for different levels aligned
- Collect mutual agreements
  - Use case Approach (helps to bring principles to concrete cases)
- Make clear what is not agreed and what the rationals are behind the positions
  - Bring these items back to FRAV in April

# A view first thoughts

- Seperate between short term and longer term

- Safety focus

- Mode confusion between different implemented HMI's will need time
  - More detailed description might help

- Use-case
  - Dual mode vehicles (L3 vs L4, how to deal with this?)
  - Passenger only
  - Remote operation will be done later

# Dates and meetings

- 16th of March 14:00 1h
- 21st of March 14:15 1h
- 28th March 15:00
- 4th of April 15:30
- 12th April 15:00
- 17th April 16:00
- 20th April 15:00

- FRAV GENEVA Week of 24th of April
