

UNECE GRSP IWG Equitable Occupant Protection (EqOP)

Draft minutes of the 3rd meeting, which was held on-line only, on September 21, 2023.
47 participants.

Adoption of the agenda

Approved.

Roll Call of participants

List of participants is sent to the IWG participants.

Summary and conclusion of the first workshop on WAD in rear-end crashes

The chair Pernilla Bremer presented the first workshop summary and conclusion, which was followed by comments, and a discussion about the next step. Ines Levallois volunteered to present the CLEPA proposal at the GRSP in December, which was appreciated. We decided to schedule a specific meeting to address the next step regarding the workshop results. Remark: all workshop presentations have been uploaded to the dedicated UN wiki page. The workshop minutes will be uploaded soon.

Worktable

The co-chair Corina Klug presented the worktable status and the outcome of a small workshop held on September 15 in conjunction with the IRCOB conference, with the worktable drafting team and researchers attending the conference. The presentation was followed by a discussion about how to share the worktable to the IWG participants. We decided to call the table "work in progress". The table will be posted on the TEAMS invitation page for the second workshop (on 23-25 October in Brussels). Remark: the TEAMS invitation will remain, but the workshop will likely be an in-person event only. Registration prior to the workshop is obligatory. The second workshop will be followed by on-line meetings on November 6 and 9, respectively, to specifically wrap up and conclude the second workshop.

Confirmation of consensus on action items

#1 A specific meeting to address the next step regarding the first workshop results. A doodle will be sent out regarding the meeting date.

#2 The secretary will share the worktable on the TEAMS invitation for the second workshop.

#3 Registration to the second workshop shall be done on October 6 at the latest, through an e-mail to Torbjorn Andersson. Accepting the TEAMS invitation does not suffice.

#4 The third workshop to address virtual crash testing will be run on November 14 in Munich. Parties that would like to take active part in the task force for virtual crash testing and intend to participate in the third workshop should contact Philipp Wernicke by e-mail.

Remark: e-mail addresses to Torbjorn and Philipp, respectively are,

Torbjorn.Andersson@autoliv.com

Philipp.Wernicke@bmw.de

Any other business

The meeting dates through GRSP in December 2023 were reviewed. Invitations to all meetings have been sent out to the IWG participants, except the additional meeting to follow up on the first workshop.
