

Proposal for Supplement **1** to the original version of UN Regulation No. 167 (Uniform Provisions Concerning the Approval of Motor Vehicles with Regard to Their Direct Vision)

Met opmerkingen [SE惠1]: "ECE/TRANS/WP.29/GRSG/2023/10"
was withdrawn in GRSG-125, so I think it will be Suppl.1 probably.

I. Proposal

Paragraph 1.1., amend to read (addition of an asterisk):

"1.1. This Regulation applies to the approval of vehicles of categories M₂, M₃, N₂ and N₃ with regard to their Direct Vision to reduce blind spots to the greatest extent possible, considering the needs of the specific type of vehicle and the operation it is intended for. *

* This Regulation offers an alternative set of requirements for vehicles of Category M₂ and N₂ derived from vehicles of categories M₁ or N₁ to satisfy the requirements of UN Regulation No. 125.

For the vehicles described above, Contracting Parties that apply both UN Regulation No. 125 and this Regulation recognise approvals to either regulation as equally valid."

II. Justification

1. Following the description in paragraph 0.9. of this Regulation, a proposal to extend the scope of Un Regulation No. 125 has been submitted. In order to avoid duplicated administrative procedure for such vehicles, a footnote is added in the scope of this Regulation.
