

Scope :

DRAFT

- SG4 can interact with other SGs (such as SG6)
- Open discussion: Clearly define the topics to be included , topics in interaction with SG6 and over arching topics ?

In-use consumption

Regular consumptions

Maintenance

From production to recycling

Scope :

- Draft Term of Reference covers all category of vehicle and all type of powertrain
- Open discussion: should SG4 give priority to some and why ?

How is the service life ?
How frequent maintenance required

How to determine energy consumption ?
What are the maintenance input ?

		Vehicle Category								
		Light Duty		Medium Duty		Heavy Duty				
		M1	N1	M2	N2	M3	N3
Powertrain	Gasoline vehicle									
	Diesel vehicle									
	CNG Vehicle									
	NOVC-HEV									
	OVC-HEV									
	Pure EV									
	Fuel Cell									
	OVC-FCHV									
	...									
	...									

List of Topics and proposals :

DRAFT

- Open discussion: Should the SG4 go for a summary to improve transparency ?

	Proposal 1	Proposal 2	Proposal 3	Proposal 4	SG4 Comments
Service life	Regional	Unique service life	Regional with option to declared higher life	-	
Energy consumption					
In-use energy consumption	Regional homologation value (WLTP, CLTC etc.)	Homologation value normalised to a standard homologation values		Real Driving value (based on OBFCM)	
Other consumptions	Efficiency of charging station	-	-	-	
Maintenance					
Urea consumption for diesel cars [Ricardo]					
Change of tires during lifetime					
Extended use					
V2X					

Meetings/Schedule : Frequency of meetings

DRAFT

- Open discussion: Should the SG4 go for a monthly meeting or a bimonthly meeting ? What should be the duration (1h or 2h) ?
