

Proposal for Supplement XXX to the to UN Regulation No. 167 (Direct vision)

I. Proposal

Annex 5, Paragraph 2.1.2., amend to read:

"2.1.2. Vehicles of category M₂ and N₂, derived from M₁ or N₁ approved to UN Regulation No. 125, shall be considered ~~to have satisfied the requirements on direct vision~~ **compliant with the requirements of this Regulation.**"

II. Justification

1. The term "direct vision" in the current text of the regulation is ambiguous since it is used in both UN R167 and UN R125. The current wording is unclear as to whether the vehicles at stake must be approved to UN R125 or simply comply with the technical requirements of that regulation.
 2. Consequently, the current wording is also ambiguous about the equivalency of the approvals between the two regulations. The proposal aims to bring clarity in this regard.
