

Q. UNR166

Part II - Vehicle Installation of Means of Front and Lateral Vision or Detection

12. Definitions

12.2. "**Ambinocular vision**" means the total field of vision obtained by the superimposition of the monocular fields of the right eye and the left eye (see Figure 1 below).

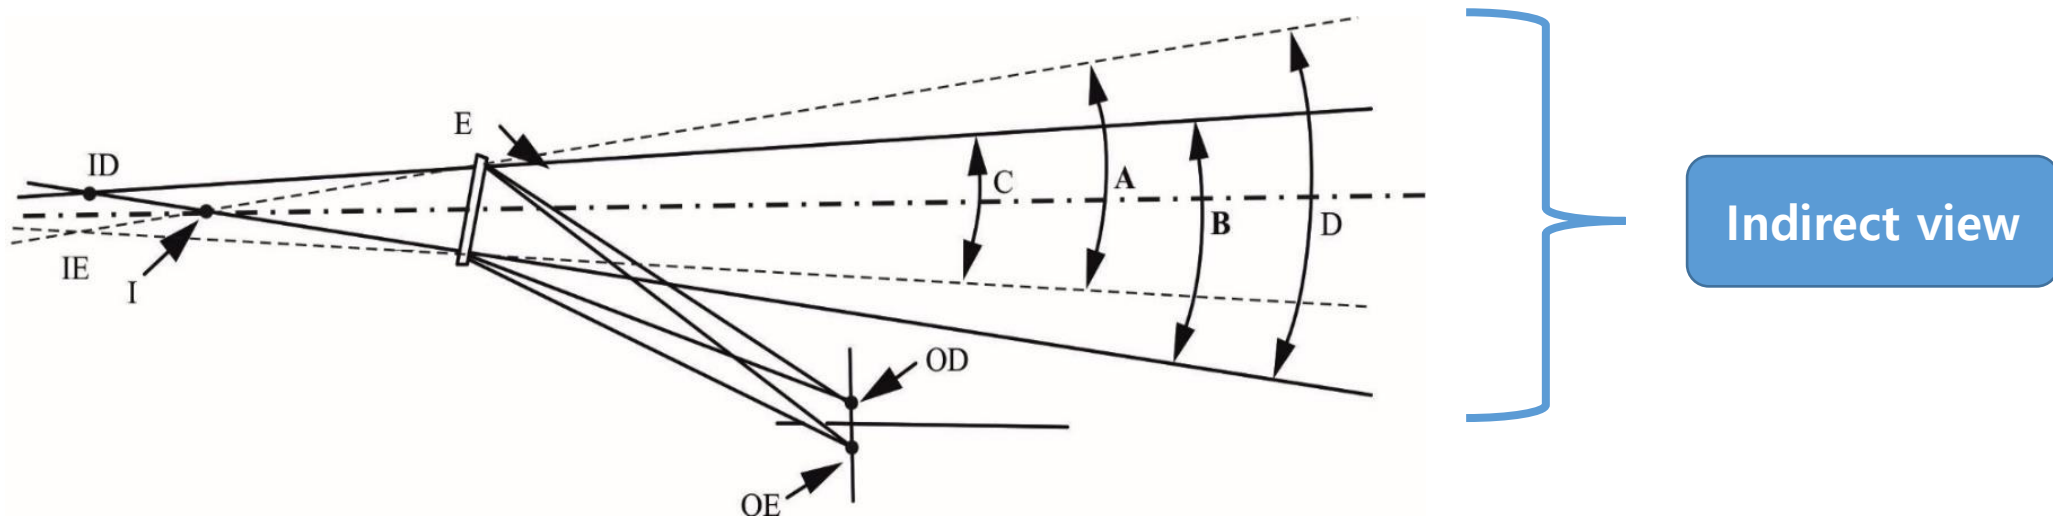

Part II - Vehicle Installation of Means of Front and Lateral Vision or Detection

15. Requirements

15.2. Close-proximity front and lateral sides field of vision

15.2.1.1. Via **the direct view** from **ambinocular vision** from the adjusted driver's ocular points, or binocular vision from the adjusted ocular reference point calculated by the methods described in Annex 10;

◆ Conclusion

- Close-proximity front and lateral sides field of vision via
 1. the direct view from ambinocular vision, or
 2. the direct view from binocular vision
- It seems that the Figure 1 (Monocular Fields) only show “Indirect view”.

◆ Question

- Where is “**the direct view**” in the Figure 1?
