Subject: RE: Request for Korea to lead EVE Topic

Dear Mr. Olechiw,

Thank you for your suggestion.

We have considered of the power determination of HEVs for several years.

We think your suggestion is an opportunity to make new test method and test procedure for EVs including (P)HEVs.

I presented our research results at 7th EVE meeting last year. (Refer to EVE-07-06e)

So, we would like to do the best to play a role in leading this item.

Unfortunately, we don't have any budget to attend the face-to-face meeting in this year.

Please consider this problem to make the next EVE IWG schedule.

Please let me know what we prepare before a conference call.

Best regards,

Dongseok CHOI
