

ACPE IWG #10

■ Text amendment for Initialization

current text ;

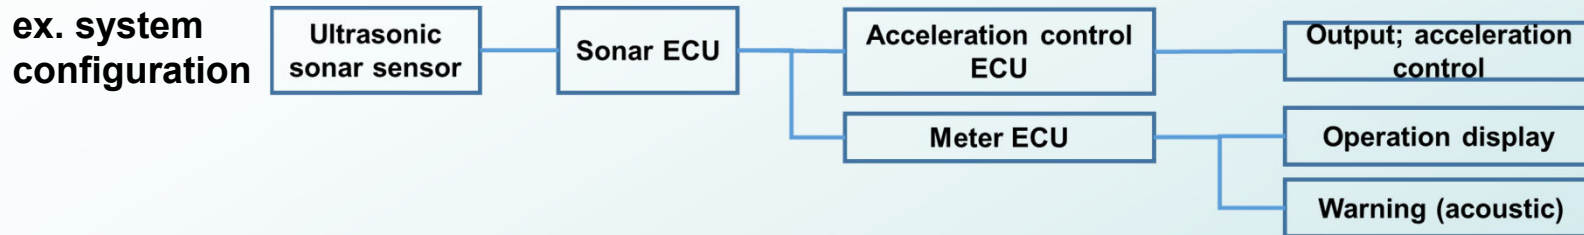

5.1.4 The ACPE shall be ready to perform an intervention no later than {6} seconds following the initiation of the vehicle powertrain.

Concern

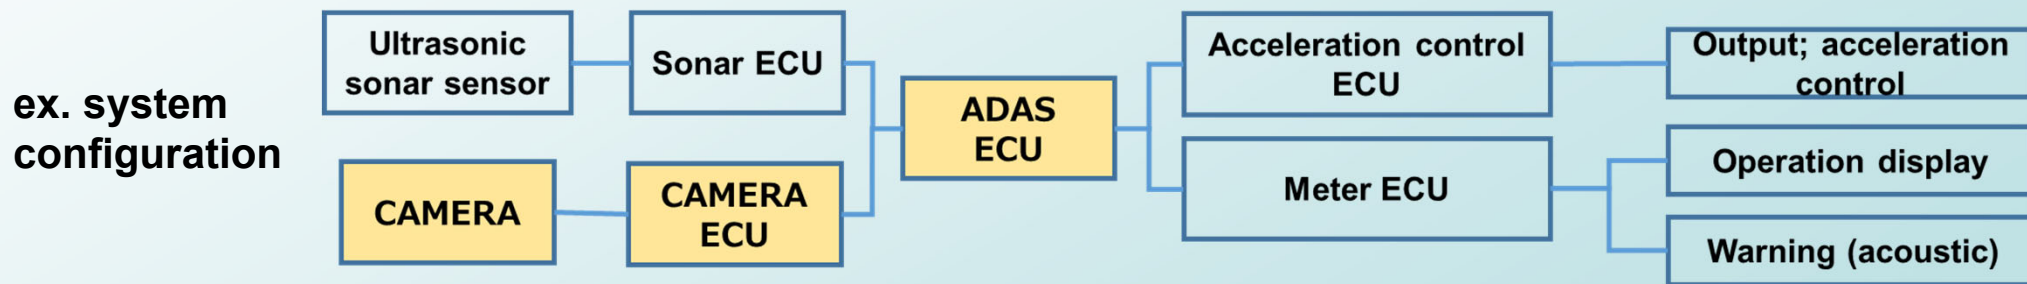

■ ref: Operation to Vehicle ; Generally using “Ultrasonic sonar sensor”

● Operation to add “Pedestrian (Child)”

It is expected that adding the use of cameras will become common to improve the robustness of pedestrian detection.

ACPE systems are becoming more complex → Overall ACPE system initialization time tend to increase

- *[Illegible text]*

■ Additional text proposal

- current text ;

5.1.4 The ACPE shall be ready to perform an intervention no later than [6] seconds following the initiation of the vehicle powertrain.

Additional text)

If the system has not been initialized after [6] seconds, information of this status shall be indicated to the driver. This information shall exist until the system has been successfully initialized.

Thank you
