

# OICA comments on GTR21 Transposition to UN-Rxxx

EVE-IWG #74

18-19.09.2024

- ❖ During the GRPE workshop on 23.05.2024, OICA was requested by GRPE chairman Andre Rijnders to draft a working document for the transposition of GTR21 to an UN-R.
- ❖ OICA prepared a draft working document that was submitted on 22. July for the 91 GRPE in Geneva.
- ❖ The WD will be amended by an informal document prior to the GRPE

In comparison with GTR21 the UN-R draft contains some additions and updates:

- Inclusion of Declared Values and tolerances of 5% between measurement and “Declared Values” (compared to 2% / 4% for UN-R85 )
- Inclusion of “equivalent methods” for the derivation of loss factors
- Inclusion of correction factors for atmospheric conditions in case of testing by third parties
- Inclusion of Identifiers of families
- Inclusion of information document and test report
- Inclusion of COP requirements
