AVLI 07-01e INVIT 2015-06-16u17.pdf AVLI 07-02e Draft Agenda 2015-06-16u17.pdf

Dear Mr. Rovers,

For your tomorrow meeting we want to give you following input (oral input of last GRE by our delegation)

Acc. to our position the max. speed of R/S is not relevant criteria only the width of the R/S. Imagine a towing vehicle with small width (e.g. tractor for vineyards) followed by a R/S type with much bigger width but design speed of less than 40km/h and therefore equipped without FPL indicating the overall width.. This is not an acceptable situation for oncoming vehicles to which only the overall width of towing vehicle is indicated.

Proposed solution: -delete reference to max. design speed of 40km/h.

6.8. Front position lamps (Regulation No. 7)

6.8.1. Presence: **Mandatory on all vehicles of category T.**  
**Mandatory on all vehicles of categories**  
**R and S exceeding 1,600 mm in width and ~~exceeding a maximum design speed of 40~~**  
**km/h.**

**Optional on other vehicles of categories**

**R and S.**

**The front position lamps may be omitted if end-outline marker lamps are installed and meet all the installation requirements for front position lamps.**

We wish you a fruitful meeting. I am sorry that I can not attend.  
If you have a new proposal pls. forward it to Mr. Wurst and myself.

Best regards Michael Pernkopf  
for GRE Austria
