

IWG VRU-Proxi – 34th meeting

4 September 2024

STU TYPE-APPROVAL

CLEPA Position

- As the device is intended to be type-approved in relation to one or more specified types of vehicle, separate technical unit (STU) type-approval applies and not component type-approval as in the [ToRs of the IWG VRU Proxi](#)
- CLEPA welcomes the introduction of STU type-approval in R151, R158, R159 and R166
- It is important to ensure a consistent approach among the 4 regulations
- CLEPA cannot give a priority to STU type-approval because of limited resources to support the effort for the regulatory work forecasted
