

# SG5 DRAFTING

## Leveling Concept Proposed

		SG3 proposal Level Concept - general characteristics-			SG5 Level Concept ver2		
	Purpose	Degree of freedom	vehicle model	supply chain model	1. Activity data of each EoL processes  e.g. weight of vehicle, parts, material etc	2. Intensity data of each EoL processes  e.g. Dismantling, Shredding, ASR thermal recovery, Mat. Recycle etc	3. Recovered parts disposal and recycling process  e.g. Tire, Lead BATT, Driving BATT etc
Level 1	strategy	multiple approaches possible	generic	generic	Global/Generic secondary data	Global or Region or Country secondary data can be chosen, depend on the study	Global or Region or Country process can be chosen, depend on the study
Level 2	strategy	multiple approaches possible	BOM & MDS	generic	Partial primary data (BOM&Generic)		
Level 3	reporting	single fixed approach	BOM & MDS	partly specific	Partial primary data (BOM&Generic)	Global or Region or Country secondary data shall be specified by LCA owner	Global or Region or Country process shall be specified by LCA owner
Level 4	reporting	single fixed approach	BOM & MDS	mainly specific	Primary data (BOM)
