Summary of Change (25 words or less)

To differentiate the requirement for the ADSF-1 and ADSF-2 concerning remote termination.

Reason for Change (Justification)

For ADSF-1, the fallback user can intervene or even take over manual control of the DDT directly. It's not necessary to trigger an ADS fallback response by using remote termination.

Location

5.1.4.4.1.

Original text

Remote termination for an ADS performing the DDT shall be capable of triggering an ADS fallback response.

Revised text

Remote termination for an ADS performing the DDT shall be capable of triggering an ADS fallback response.

Notwithstanding the paragraph above, remote termination shall not be possible while ADSF-1 is still active.
