

REVISION OF SAE J3016 (From Jack Pokrzywa)

There are 2 main things to remember about the new version:

1. The SAE Task Force is not radically changing the taxonomy with this re-write (it remains harmonized with BAST, OICA, et al.)
 2. The SAE Task Force will respond to all feedback (including criticism) received during application of J3016 over the past ~2 years.
- The hope is to ballot this version before the end of the year and publish it in Q1 2016.
 - However, if a lot of new people join the committee, this may take a bit longer.
