

These numbers can be used to avoid long distance charges for hosts and participants. Please use the corresponding number for the country you are dialing from to enter your audio conference. If you are the host and would like to only communicate one number, than participants will have to dial the corresponding International Dial for Local Access number if they are outside of the country where the number originates.

\* Some National numbers cannot be dialed outside of the listed country. Actually when it is mentioned NATIONAL NUMBER in the column Town, it means that the International Access number cannot systematically be guaranteed, because some phone operators do not allow calls to such a phone number.

## International Local Access Numbers
