

Correction of Line 9.2.4.4 “Electric power train” in the table of 9.2.1.1.

Several questions were received on the applicability of 9.2.4.4, based on the crosses introduced in ADR 2025.

In ADR 2025 the line is as follows:

Technical specifications	EX/II	EX/III	AT	FL	
9.2.4.4			X		

In the process of adopting the new wording several modifications were introduced, in particular on the original notes to exclude electric vehicles from the carriage of EX articles and substances and electrified trailers for all categories. The intention was to use notes for easy removal once conclusion was reached on these topics.

However, at this moment 9.2.4.4 reads:

“9.2.4.4 Electric power train

Electric power trains shall not be use for Ex vehicles. Trailers with re-generative braking or electric power train are not allowed.”

It is obvious when approaching the provisions from the table that the exemptions should apply to EX/II and EX/III directly and electrified trailers for all categories.

It is proposed to correct the table of 9.2.1.1, line 9.2.4.4 as was originally proposed by the Informal Working Group (INF 6 WP.15 April 2024 proposal 2) to read:

Technical specifications	EX/II	EX/III	AT	FL	
9.2.4.4	<u>“X”</u>	<u>“X”</u>	X	<u>“X”</u>
