

OICA proposal for Annex 7:

Current Par. 2.2

The tested-devices listed in paragraph 7.6.1 shall be connected to the test fixture only by the intended mountings provided for the purpose of attaching the representative AECD installation.

Proposed Par. 2.2

The tested-devices listed in paragraph 7.6.1 shall be connected to the test fixture only by the intended mountings provided for the purpose of attaching the representative AECD installation.

For the optional tested-devices listed in paragraph 7.6.2, their fixation are at the choice of manufacturer.

If the intended mounting of the power source is part of the crash energy absorption strategy of the vehicle, an appropriate mounting shall be used instead.
