Dear all,

Please, find hereafter some comments from FRANCE for the next meeting:

- The item “9. Fixing point information and vehicles N1” in the waiting list (R55_13_13) may be withdrawn because after analysis, on the one hand, of the current regulation R55, and on the other hand, of the document ECE/TRANS/WP.29/GRRF/2015/35 adopted at the 80th session of GRRF, there is no more need to add further information on the category N1 vehicle loading conditions. It is clear enough for the application.

- Concerning the item 7 included in the list (R55_13_12): It is considered as being cancelled by the group but not for me. So I try to explain why. You will find attached:
  - an history of the extracts of the meeting reports from the 7th meeting to the last one about this item (item7.docx)
  - the object of this item 7 and the content of the proposal (R55_07_20-item7-Attachment point.docx)

You can note that the proposal was well received at the 7th meeting, and that since this meeting the group is awaiting an answer from me, I have to check-up whether there are anything in the French law that makes an integrated approval of coupling and drawbeam impossible. Now, at this question I can answer “No”, so we are always interested to take into account this amendment of R55 initially tabled by Jürgen (unfortunately I didn’t find the reference of the document) and reviewed by us at the 7th meeting.

Bolennarth, please could you add this item in the agenda in order to rule definitively on it? Thank you in advance.

Have a good weekend and See you at Paderborn.
Best regards.

Objet : List of items and waiting list

Dear Experts,

The list of items as well as the waiting list are now updated and uploaded to the webpage. New documents are allocated to some of the different items. Please note that items not having a new document allocated since our last meeting are unlikely to be agreed at the our next meeting.

Best Regards
