

# Category of Abrasion Limits

34<sup>th</sup> TF TA  
5<sup>th</sup> June 2025

**JAPAN AUTOMOBILE STANDARDS INTERNATIONALIZATION CENTER**

For 3PMSF tyres, it is reasonable to apply a milder limit than Normal, considering winter road safety.

3PMSF : +0.1

For the sub-cluster, mitigation measures for tyres with low wear particle emissions can be considered, for tyres with low LI, with similar mitigation as for rolling resistance (LI < 87) in UN R117.

LI < 77 : +0.1

Ultra High Performance (UHP) tyre

✓ Criteria: AR ≤ 40 and SS ≥ Y (same as R117 for RR)

UHP : +0.1
