Justification:

In the world, there are many languages

The ITU-T covers a few languages and there is no korea language in ITU-T P.501

I think, it is problem to only use a few language defined in ITU-T P.501, Annex B

And I think, many languages should be able to be used in AECS

I'd like to recommend that first sentence should be added with the sentence **“If the language of a contracting party is not included in Annex B then that contracting party can determine its own test sentence pairs”**”
