

Proposal for amendments to WP.29-198-09

The text reproduced below is based on that of WP.29-198-09. The modifications to that text are indicated in **bold** for new characters and ~~strike through~~ for deleted characters.

I. Proposal

Paragraph 5.3.2., amended to read:

5.3.2. The following table details the data elements of time-series data to be recorded during a triggering event.

<i>Data element</i>	<i>Condition for requirement</i>	<i>Recording interval/time (relative to triggering event)</i>
Visual images ⁴	Mandatory	-7 to +7 seconds

II. Justification

The latest proposal for a new United Nations Regulation on uniform provisions concerning the approval of motor vehicles with regard to their Automated Driving Systems is WP.29-198-09. In WP.29-198-09, the "condition for requirement" field in the visual image table in section 5.3.2 is blank. However, the EDR/DSSAD-IWG has already agreed to set this field to "Mandatory." This proposal is to add "Mandatory" to the blank field in the WP.29-198-09 document.
