Proposal for addition of lateral  
facing carrycot icon to the module  
labelling options.

Erik Salters,  
Dorel  
18 oktober 2016

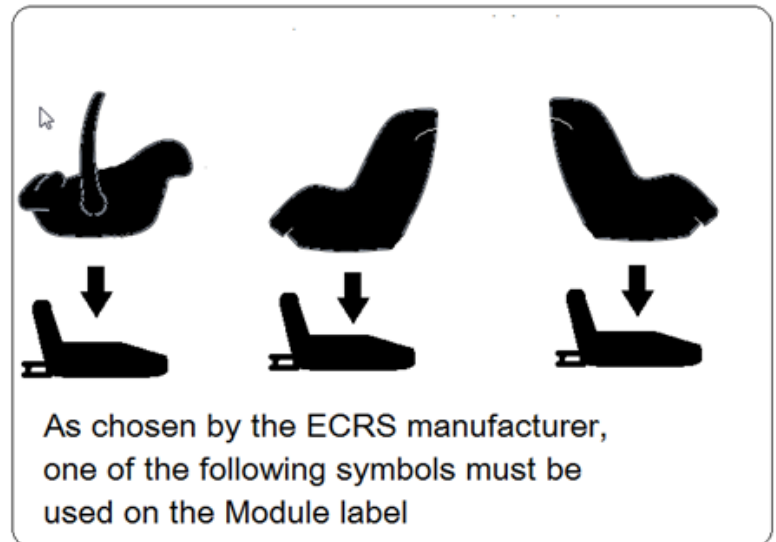

# Current R129-01

- Current R129-01 depicts following label to be placed on a module

- This module label must use one of the following symbols:

# Lateral Facing Carrycots & Combination seats

- Lateral Facing carrycots could also be installed on an ISOFIX base
  - ❑ Propose to depict a symbol showing a LF carrycot
- Seats exist that combine a rearward and forward facing mode. It could lead to misunderstanding if only one of these modes is depicted on the module label (regardless of the question which one should be chosen? )
  - ❑ Propose to allow more than one symbol on the module label

Proposal  
old:

As chosen by the ECRS manufacturer,  
one of the following symbols must be  
used on the Module label

new:

By choice of the ECRS manufacturer, one or more of the  
following symbols must be used on the module label
