Dear WP29 participant

WP29 - ITS/AD Task Force on cyber security and over the air software updates for the automotive industry.

Following the deliberations at the tenth Meeting of the ITS/Automated Driving informal working group on 16 November 2016, the World Forum WP.29 decided to establish a task force to address:

i)   cybersecurity & data protection, and

ii)   over the air issues for road vehicles.

I would like to invite you (or your specialists) to an inaugural meeting of this group where we will agree Terms of Reference and start addressing these very important issues.

The meeting will be held on the 21 December 2016, at the Department for Transport offices at the address shown above. I propose we start at 09:00 a.m. and finish at 4:00 p.m.

I will circulate a formal agenda next week and if you have items you would like included, or documents you would like to share ahead of the meeting, please let me know.

I would be grateful if you could confirm the names of those who will attend the meeting so that we can make the necessary arrangements for access to our offices. Please do so by December 14 to Darren.Handley@dft.gsi.gov.uk

Best Regards

Darren Handley
