

Proposals for the terms of reference and rules of procedure

I. Proposal

- 1. The TF should consider the requirements of all interested parties such as governments, industries, consumers, etc.*
- 2. The TF should consider the existing laws, regulations and standards of the contracting parties, as well as their applications to information security of ICV.*
- 3. Based on common rules of information security, the TF should consider the characteristic using of vehicles and figure out the particular information security rules for vehicles, which are proposals, requirements, evaluation methods and management approaches.*
- 4. The outputs of the TF should be clearly classified to be either regulations, resolutions, recommendations or guidelines according to their different types of applications.*
- 5. For data protection, it is recommended to adopte a classification mechanism for easier management, in order to achieve the balance between public and private of the data.*
- 6. Conducting a thorough survey of information security regulations and standards released by other organizations, and bringing them into TF scope for coodination, if appropriate.*
- 7. If possible, China would be pleasure to hold the TF meeting and provide any assist for the meeting arrangement.*

II. Justification

China has always been willing to provide proposals to the TF and will continue to do so.
