Status of OBD TF

2/4

- 1 face to face meetings was held after the 18th IWG.
(2nd June)
- We worked on harmonization of definitions with EPPR (IMMA).
 - Calculated load value, Useful life, Engine misfire, OBD threshold limit, Limp-home, Pending DTC, Confirmed DTC, Readiness, etc.
 - TF had conclusions on most of words.
 - TF found definition of “Useful life” is missing from GTR 15. TF would like to ask IWG to fix definition of “Useful life” in GTR 15, instead of working this under OBD TF.
- TF still need to decide whether to continue the discussion without OBD expert from EC or not.
 - EC need time to sign in the expert of OBD into TF members, until IWG in Sep.
 - TF would like to know if there are any chance of extending the deadline for OBD.
