

Action Items

Energy consumption

Actions to be completed by: Andrew Giallonardo

- To develop modified presentation to Romain for GEEE and circulate for comment

Actions to be completed by: All members

- All comments for modified presentation for GEEE due back by 6:00 pm EDT (10:00 pm CEST) on Monday October 30th

System Power Determination

Actions to be completed by: Andrew Giallonardo

- Send Heinz Steven invitation to January EVE meeting
- Reach out to Korea on validation testing
- Create EVE drafting group page on the UNECE wiki site and ask for write access for Mike S.
- Ask WP. 29 secretariat if ISO draft procedure can be shared more broadly

Actions to be completed by: Mike Safoutin

- Share draft in advance of January Meeting with Heinz and Serge Dubuc
- To distribute share-point logins, set up permissions
- Schedule 1 drafting group meeting soon and two more before Christmas
- Extract list of open technical which exist at this time to be discussed at January EVE meeting (list would become working document and could be expanded based on findings of validation testing program)

Actions to be completed by: USA

- Reach out to Mike Duoba on validation testing for ISO procedure and willingness to do the testing
- Submit commitments for validation testing

Actions to be completed by: Matthias and Annika

- Discuss possibility of providing vehicles and the possibility of conducting validation testing at the next OICA meeting

Actions to be completed by: Matthias

- Ask Serge if he could share the terms of reference for WLTP drafting to be used as an example

- Share copy of WLTP calendar for global holidays and upcoming meetings
- Reach out to Heinz separately from Andrew about attending next EVE meeting in Geneva

Actions to be completed by: Canada

- Confirm validation testing availability
- To be testing coordinator and organizer
- Investigate translation of Japanese testing report used to inform ISO report for sharing

Actions to be completed by: Japan

- To investigate whether additional test results related to TP1 which were used to develop ISO procedure can be translated to be shared with EVE
- Check reports to find out if they identify the sources of test-to-test variation for TP2

Action to be completed by: GTR Drafting group

- Develop terms of reference for drafting of the GTR (Coordination with Matthias for using WLTP draft as an example)
- Further follow up with roles to be assigned on GTR drafting group to individuals

Action to be completed by: André

- To ask new GRPE Secretary what is needed to make mandate more specific for GTR development

Action to be completed by: KUBODERA-san

- To ask ISO if MS word version of draft procedure can be shared

Durability

Action to be completed by: JRC

- Implement comments received on modelling and push forward validation using testing data from Canada

Action to be completed by: Elena Paffumi

- Raise whether Commission has views on durability requirement out to 160,000 km (in line with durability check requirement for conventional pollutant after treatment)

Action to be completed by: WLTP Durability Group

- Prepare to discuss in January why durability requirements might be different between conventional and EV at next meeting
- Review status report and modelling information for JRC

- Provide other contacts or data if others know of durability data that is available to correlate model with real life observations

Action to be completed by: Andrew Giallonardo

- Prepare consolidated matrix of all views (i.e. add Japan to work done yesterday) on durability and circulate for comment, eventually to be shared with WLTP before January 2018 meeting

Action to be completed by: Matthias Naegeli

- To share definitions from WLTP and share with group for durability purposes (various CO₂ values, etc.) – i.e. share the relevant definitions, how these values are defined

Action to be completed by: Martha Christenson

- be prepared to share updated durability test results at March meeting

Action to be completed by: NIIKUNI-san

- Look at data/methodologies for air pollutant durability for conventional vehicles

Action to be completed by: US EPA

- Review in-use data for HEV and PHEV vehicles for air pollutant durability

Other Action Items

Action to be completed by: Everyone

- Send all documents related to January EVE meeting by December 22 for posting

Action to be completed by: Matthias Naegeli

- To report whether WLTP-EV will meet in Geneva during January GRPE

Action to be completed by: Andrew Giallonardo

- Send out email invitation for ½ day meeting in Geneva (January 8, 2018) (rooms to be determined)
