

# INDUSTRY PLAN FOR EVS GTR RELATED RESEARCH

MARCH 2018

# CURRENTLY PLANNED INDUSTRY RESEARCH

## ACEA

- Field data investigation – Europe
- Implementation of “Documented Approach”
- Evaluation of proposed test methods – pending test method consensus
- Round Robin test design – pending test method consensus
- Additional 2018 projects under consideration

## AAM

- Field data investigation – North America/US
- Collaborating on implementation of “Documented Approach”
- Additional projects under consideration

# FIELD DATA INVESTIGATION

Gather public field data information (OEM, insurance companies, media, rescue services, government sources)

- Share lessons learned between European and North American efforts

Analysis to identify occurrence of confirmed thermal propagation incidents caused by internal short circuit

Comprehensive data report / presentation

- Plan to share with EVS GTR IWG
- Target September 2018 meeting

# IMPLEMENTATION OF “DOCUMENTED APPROACH”

Collaboration to detail practical implementation:

- Risk assessment template
- Level of documentation
- Types of documents and data sets

Considering development of non-proprietary documentation package to share with IWG contracting parties
