

**JRC comments and  
questions in advance  
EVS1536-613 OICA  
EVS GTR IWG Session #15  
Beijing, March 2018**

<b>Document</b>	<b>Title</b>	<b>Author</b>
EVS1536-613	Thermal Propagation Topics	Galen Ressler OICA

**Comment – Thank you for the interesting results that are contained in the presentation.**

- 1. General question: In how far are the presented effects of metal contaminants representative for Li-ion cells in general?**
- 2. More specifically: How would the results be expected to change for the following?**
  - Other cell chemistries
  - Other types of cell housing
  - Larger cell size
  - Other types of contaminant particles (different from iron)
