

**JRC comments and
questions in advance
EVS1538-615 ISO
EVS GTR IWG Session #15
Beijing, March 2018**

Document	Title	Author
EVS1538-615	TC22 SC37 WG3 Liaison Report for EVS-GTR Thermal Propagation Work Item	Brian J. Lawrence ISO

Comment – Thank you for the update on these activities.

- 1. Questions on slide 3: Have preferred candidate methods for initiation already been identified (and non-preferred candidates been eliminated)?**
- 2. If not, what is the expected timeline for method selection?**
- 3. A 'documented approach' is mentioned. Can you provide more information about this approach?**
- 4. Question on slide 4: The TRIM heater method is rated 1 (= poor) on 'Tamper resistancy'. Could you explain the rationale for this rating?**
