

**JRC comments and  
questions in advance  
EVS1542-502 China  
EVS GTR IWG Session #15  
Beijing, March 2018**

<b>Document</b>	<b>Title</b>	<b>Author</b>
EVS1542-502	Li-ion Battery Thermal Runaway Caused Toxics and Analysis	Sun Jie China

**Comment – Thank you for the interesting presentation.**

- 1. Question on slide 3: Can you provide further research results on the topics listed on slide 3?**
- 2. Question on slide 6: The presentation seems to refer to emissions from Li-ion batteries following accidents. Why does the table refer to occupational exposure levels (and not to accident exposure)?**
