No agenda was prepared as the main topic of the meeting was mainly concerning the revision of the informal proposal for Transitional Provisions of R10.05 – Supplement 2.

Document: [GRE-TF-EMC-10-02e GRE-2017 TPs Informal Revised GRE-78-09](#) (TF-EMC)

1. Introduction from Ariel Lecca:

Following some discussion, in OICA preparation meeting for next GRE 78th session, on the Revision 3 of 1958 Agreement, it was found that the informal proposal GRE-78-09 contents some possible misunderstanding.

For the introduction of the 05 Series of Amendments, only one Transitional Provision was developed (paragraph 13.11, now 13.2). So it was decided in September to add additional Transitional Provisions. In fact those new Transitional Provisions for the 05 Series in GRE-78-09, are applied also to the new Supplement 2. This means that Supplement 2, if adopted, will be mandated immediately due to the date of 19th of October 2017.

During the discussion inside OICA, it was understood that the Revision 3 of 1958 Agreement (Guideline WP.29/2017/107 + corr.1) could allow to apply Transitional Provisions to Supplement as shown in the new TPs informal revised version.

So it was decided by all participants,

- To keep the deletion of old Transitional Provisions for 03 and 04 Series.
- To add Transitional Provisions for 05 Series (Paragraphs 13.1., 13.3. and 13.4.)
- To add specific Transitional Provisions for Supplement 2 to 05 Series of Amendments (Paragraphs 13.5. to 13.9.)

France raises the question why the TPs for Supplement 2 are necessary?

OICA replied that the goal of the previous informal document GRE-78-09 was not to apply immediately the Supplement 2, as mandatory. We always asks for some time to implement it.

So in case the Transitional Provisions are not adopted in GRE next week, it could be part of the 06 Series of Amendments to UN R10, but with a delay.

India asks why the old Transitional Provisions for 03 and 04 Series were deleted. OICA answers that it was discussed before in previous sessions of GRE TF-EMC and as all dates for 03 and 04 Series are passed, we thought it was not anymore needed to keep them.

However, the new Transitional Provision in paragraph 13.7. (before it was 13.3.) still allows to make extension to already type approved device/vehicle under 03 or 04 Series of Amendments.

France asks about the Transitional Provisions time period of 5 years in paragraphs 13.8. and 13.9. These periods seems to be very long.

OICA explains that Transitional Provisions for 05 Series were missing and then we had to make a difference for Supplement 2.

This Supplement 2 is a clean and editorial version of UN R10.05 and it should be available soon for everyone to work on a proper document. OICA will argue to GRE next week that this is important and urgent to have it entry into force.

It was proposed the same timing as for previous Transitional Provisions. The date is still under square brackets and it will be discussed on next week.

Conclusion:

- Germany had some editorial remarks on the Justification. It was corrected and the final text will be distributed to the GRE TF-EMC members.
- No other comment were done either by Contracting Parties or NGOs. The [revision 1 of GRE-78-09](#) will be submitted to UNECE Secretariat.
- The Status Report (GRE-78-10) will be updated accordingly to the changes of the informal proposal for Transitional Provisions. To be sent as [revision of GRE-78-10](#)

2. Next meeting dates

11th session of GRE TF-EMC: 17th of November – 9:00 to 11:00:

- Feedback of GRE 78th session discussion.
- Start the works on UN R10.06
