

Agenda WLTP SG EV Web Meeting 29th of August 2017

Web-Audio Meeting information:

- I. **Login data:**
<https://ecwacs.webex.com/meet/sporsti-ronnberg>

- II. **Agenda for the meeting is as following:**
 - 1.) Further discussion concerning the development of a Low Temperature Test Procedure → as input for the Low Temp TF meeting in Ispra (September 15th/16th)
 - Discussion based on (in advance of the web-audio) provided scenarios which
 - a. reflect the different aspects which need to be considered (e.g. REESS preconditioning, etc.)
 - b. point out the importance of the purpose of the values (only customer information?) and the temperature set point
 - If new information is available: Discussion of the possibility to use simulations instead of a physical test

 - 2.) Battery performance and durability
 - As written in the attached minutes: further discussion within WLTP SG EV earliest after meeting/discussion between JRC and EC

 - 3.) Drive Trace Index
 - As written in the attached minutes: further discussion based on T&E proposal
 - If additional proposal which are being shared in advance: including these proposals in the discussion

 - 4.) Run-In-Mileage for PEVs and NOVC-FCHVs
 - Further discussion on proposal for a representative run-in for PEVs/NOVC-FCHVs

 - 5.) REESS definition in GTR
 - Feedback from web-audio conference on July 25th (organized by Serge Dubuc)

 - 6.) AOB
