

# Illustration of Vehicle Attributes for EVE

## Reference Guide discussion

### Infrastructure:

- Wireless charging
- On-board charging system
- Off-board charging standard related to the vehicle
- Vehicle as electricity supply

### Vehicle:

- Electrified Vehicle range
- Energy consumption/efficiency
- Vehicle driver-user information
- Vehicle recycling and re-use
- Vehicle labeling

### Market Deployment Support:

- Regulatory incentives

### Battery:

- Battery performance
- Battery durability
- Battery recycling
- Battery re-use (post-mobility)

### Annex:

- Financial incentives
- Consumer awareness
- Government purchasing
