Subject: Transposition of GTRs: notifications and state of play in the EU at the end
of 2012 with regard to the Agreement concerning the establishing of
Global Technical Regulations (GTR) for wheeled vehicles, equipment and
parts which can be fitted and/or be used on wheeled vehicles (1998
Agreement)

The Directorate-General for Enterprise and Industry (DG ENTR) of the European
Commission, on behalf of the EU presents its compliments to the Secretary General of
the United Nations and has the honour to refer to the Agreement concerning the
establishing of Global Technical Regulations (GTRs) for wheeled vehicles, equipment
and parts which can be fitted and/or used on wheeled vehicles (1998 Agreement), done at

DG ENTR has the honour to provide the following notifications and updates on the state
of play of the 12 GTRs to the Secretary General under Article 7 of the 1998 Agreement.

GTR No. 1: door locks and door retention components

The EU notified the UN on 08 February 2008 that GTR No. 1 regarding door locks and
door retention components was transposed in EU approval legislation (final
notification).

At the 157th session of WP.29 in June 2012 amendment 1 to GTR No. 1 was agreed
which ensures that GTR No. 1 is updated for technical progress.

The requirements of amendment 1 to GTR No. 1 were transposed into UN regulation No.
11, which was accepted as alternative to Directive 70/387/EEC\(^1\). Directive 70/387/EEC
was repealed by means of Regulation (EC) No. 661/2009\(^2\). Subsequently, UN Regulation
No. 11 was made mandatory in EU type-approval by means of Commission Regulation
(EU) No. 1229/2012 of 10 December 2012 amending Annexes IV and XII to Directive

---

\(^{1}\) OJ L 176, 10.08.1970, p. 5.
concerning type-approval requirements for the general safety of motor vehicles, their trailers and
2007/46/EC (Framework Directive)\textsuperscript{3}. Consequently the European Union has transposed amendment 1 to GTR No. 1 (final notification).

**GTR No. 2: measurement procedure for two-wheeled motorcycles equipped with a positive or compression ignition engine with regard to the emission of gaseous pollutants, CO\textsubscript{2} emissions and fuel consumption (WMTC)**

The EU notified the UN on 29 August 2006 that GTR No. 2 regarding the World-harmonised Motorcycle Test Cycle (WMTC) was transposed in EU approval legislation (final notification).

At the 143\textsuperscript{th} session of WP.29 in November 2007, respectively at the 149\textsuperscript{th} session of WP29 in November 2009 amendments 1 and 2 to GTR No. 2 were adopted. Both amendments ensure that the GTR No. 2 is updated for technical progress.

The vehicle speed profile set-out in GTR No. 2 is accepted in the EU as alternative to the relevant provisions for two-wheeled motorcycles set-out in Chapter 5 of Directive 97/24/EC\textsuperscript{4}, amended by Commission Directive 2006/72/EC\textsuperscript{5}. The amendments 1 and 2 and associated supplements to GTR No. 2 have been integrated in the draft proposal for a Regulation on environmental and propulsion performance requirements (REPPR) for the approval of L-category vehicles and is therefore anticipated to be transposed in EU approval legislation in the future. However, in the meantime certain flaws and errors have been noted in GTR No. 2, which have to be corrected before the Union can entirely replace the environmental requirements regarding emission test types I and II, by referring to the provisions set-out in GTR No. 2. For this purpose the EU is sponsoring the UNECE L-EPPR working group operating under GRPE in order to discuss the identified concerns with other contracting parties and to find solutions to address these issues and concerns. In summary, transposition of amendments 1 and 2 of GTR No. 2 is in process.

**GTR No. 3: motorcycle brake systems**

The EU notified the UN on 08 February 2008 that GTR No. 3 regarding motorcycle brake systems had been transposed in EU approval legislation (final notification).

At the 145\textsuperscript{th} session of WP.29, in June 2008, amendment 1 to GTR No. 3 was adopted. This amendment 1 ensures that GTR No. 3 is updated for technical progress.

The measurement of the Peak Braking Coefficient (PBC) as referred to in amendment 1 to GTR No. 3 may be measured according to the test procedure set-out in Appendix 1 to Annex 3 of UN Regulation No. 78, which is proposed to be part of EU approval legislation set-out in Annex VIII to Regulation 2010/0271(COD)\textsuperscript{6} regarding approval and market surveillance of two- or three-wheel vehicles and quadricycles and its proposed delegated act regarding vehicle functional safety (RVFSR). The EU is therefore in the

process of transposing amendment 1 to GTR No. 3 in EU approval legislation of L-category vehicles.

**GTR No. 4: Test procedure for compression-ignition (C.I.) engines and positive ignition (P.I.) engines fuelled with natural gas (NG) or liquefied petroleum gas (LPG) with regard to the emission of pollutants (WHDC)**

The EU notified the UN on 08 February 2008 that GTR No. 4 regarding the World-harmonised Heavy Duty vehicle Test Cycle (WHDC) had been transposed in EU approval legislation (*final notification*).

At the 149th session of WP.29 in November 2009, respectively at the 151st session of WP.29 in June 2010 amendments 1 and 2 of GTR No. 4 were adopted. Both amendments ensure that GTR No. 4 is updated for technical progress.

Amendments 1 and 2 of GTR No. 4 have been transposed in UN Regulation 49 and in Commission Regulation (EU) No 582/2011\(^7\), which both make part of the EU approval legislation for Heavy Duty vehicles. Consequently the EU would like to herewith notify the UN that Amendments 1 and 2 to GTR No. 4 have been transposed in EU approval legislation (*final notification*).

**GTR No. 5: technical requirements for on-board diagnostic systems (OBD) for road vehicles**

The EU notified on 08 February 2008 that GTR No. 5 regarding on-board diagnostic systems had been transposed in EU approval legislation (*final notification*).

At the 158th session of WP.29 in November 2012 amendment 1 to GTR No. 5 was agreed which ensures that GTR No. 5 is updated for technical progress.

Amendment 1 to GTR No. 5 was transposed into UN Regulation 49 and into Commission Regulation (EU) No 64/2012\(^8\). Thus, the European Union has transposed amendment 1 to GTR No. 5 (*final notification*).

**GTR No. 6: safety glazing materials for motor vehicles**

At the 144th session of WP.29 in March 2008 GTR No. 6 regarding safety glazing materials was adopted.

Subsequently the requirements of GTR No. 6 were transposed into the existing UN Regulation No. 43, which is accepted in the EU as alternative to Council Directive 92/22/EEC\(^9\). In accordance with Regulation (EC) No. 661/2009\(^2\), Directive 92/22/EEC will be repealed as of 1 November 2014 and replaced by UN Regulation No. 43 for EU

---

whole vehicle type-approval. Consequently the European Union has transposed GTR No. 6 (*final notification*).

At the 156th session of WP.29 in March 2012 amendment 1 to GTR No. 6 was agreed to correct GTR No. 6.

Amendment 1 to GTR No. 6 is transposed into UN Regulation 43. Thus, the European Union has transposed amendment 1 to GTR No. 6 (*final notification*).

**GTR No. 7: head restraints**

At the 144th session of WP.29 in March 2008 GTR No. 7 regarding head restraints was adopted.

An initiative has been taken in the past in order to transpose the requirements of GTR No. 7 as in its current adopted state into the existing UN Regulation No. 17 by means of working document ECE/TRANS/WP.29/GRSP/2009/15. The UN Regulation is an accepted alternative to Council Directive 74/408/EEC\(^\text{10}\), according to Annex IV of Directive 2007/46/EC\(^\text{11}\).

By means of the General Safety Regulation\(^2\), Directive 74/408/EEC will be repealed as of 1 November 2014 and replaced by UN Regulation No. 17 for EU whole vehicle type-approval. However, the work on phase 2 of the GTR is currently in an advanced state and it was therefore decided to instead transpose the GTR including the phase 2 requirements at once into UN Regulation No. 17 when the GTR phase 2 process is finished. As a result the aforementioned proposal has been withdrawn and an updated proposal will be submitted for consideration of GRSP in line with the completion of phase 2.

**GTR No. 8: electronic stability control systems**

At the 145th session of WP.29 in June 2008 GTR No. 8 was adopted.

The General Safety Regulation\(^2\) sets-out the mandatory application of electronic stability systems in compliance with the prescriptions of UN Regulation No. 13-H into which GTR No. 8 has been transposed. As of 1 November 2011 such application is mandatory for new types of the relevant categories M\(_1\) and N\(_1\) vehicles and as of 11 November 2014 it is mandatory for all new vehicles of these categories being registered in the EU. Consequently the European Union has transposed GTR No. 8 (*final notification*).

**GTR No. 9: pedestrian safety**

The EU notified the UN on 11 May 2010 that GTR No. 9 on pedestrian safety had been transposed in EU approval legislation (*final notification*).

---

At the 152\textsuperscript{nd} session of WP.29, in November 2010, amendment 1 to UN GTR No. 9 was adopted. This amendment ensures that GTR No. 9 is updated for technical progress.

GTR No 9 and amendment 1 were transposed in UN Regulation No. 127 and in Commission Regulation (EU) No 459/2011\textsuperscript{12}. Consequently the EU would like to herewith notify the UN that Amendment 1 to GTR No. 9 has been transposed in EU approval legislation (\textit{final notification}).

\textbf{GTR No. 10: Off-cycle emissions (OCE)}

At the 148\textsuperscript{th} session of WP.29 in June 2009 GTR No. 10 on off-cycle emissions (OCE) was adopted.

GTR No. 10 was transposed in UN Regulation No. 49 and in Commission Regulation (EU) No. 582/2011, which are part of the EU approval legislation for Heavy Duty vehicles. Consequently the EU would like to herewith notify the UN that GTR No 10 has been transposed in EU approval legislation (\textit{final notification}).

\textbf{GTR No 11: Test procedure for compression-ignition engines to be installed in agricultural and forestry tractors and in non-road mobile machinery with regard to the emissions of pollutants by the engine (NRMM)}

At the 149\textsuperscript{th} session of WP.29 in November 2009 GTR No. 11 on emission requirements for engines fitted in agricultural and forestry vehicles as well as in non-road mobile machinery (NRMM) was adopted.

GTR No. 11 has been transposed in the existing UN Regulation No. 96 which makes part of the EU legislation as UN Regulation No. 96 is referred to in Directive 97/68/EC\textsuperscript{13}. Consequently the EU would like to herewith notify the UN that GTR No. 11 has been transposed in EU approval legislation (\textit{final Notification}).

\textbf{GTR No. 12: location, identification and operation of motorcycle controls, tell-tales and indicators}

At the 155\textsuperscript{th} session of WP.29 in November 2011 GTR No. 12 was adopted.

GTR No. 12 is in process of being transposed into existing UN Regulation No. 60 regarding uniform provisions concerning the approval of two-wheeled motor cycles and mopeds with regard to driver-operated controls including the identification of controls, tell-tales and indicators. The EU is considering making UN Regulation No. 60 compulsory in the proposal for a Regulation on vehicle functional safety requirements (RVFMR) regarding the approval of L-category vehicles and it is likely that the UN Regulation will indeed be transposed into EU approval legislation. In summary the EU

herewith reports that the transposition of GTR No. 12 in EU approval legislation is in process.

The Directorate-General for Enterprise and Industry of the European Commission avails itself of this opportunity to renew to the Secretary General of the United Nations the assurances of its highest consideration.
