

Draft report summarizing the tests completed to evaluate Reg. 22/06 limit proposal

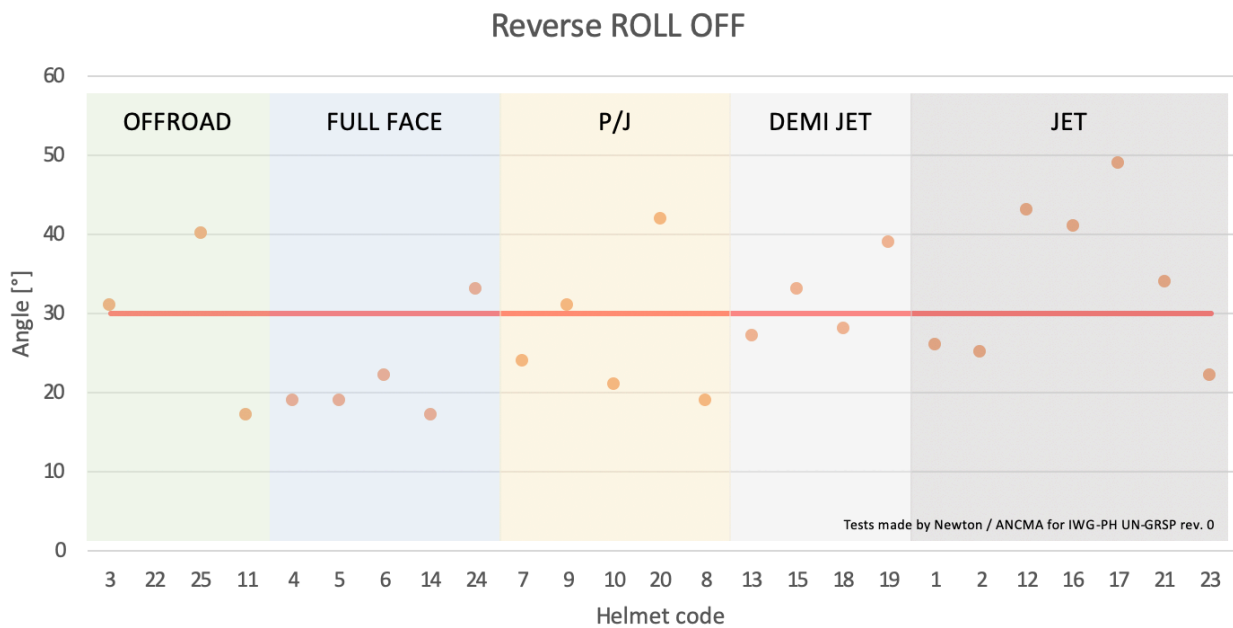

The following graphs summarizes the tests completed within IWG-PH UN-GRSP by Newton / ANCMA in preparation to the 5th session of the Informal Working Group.

The values reported are the WORST result obtained for each model of helmet.

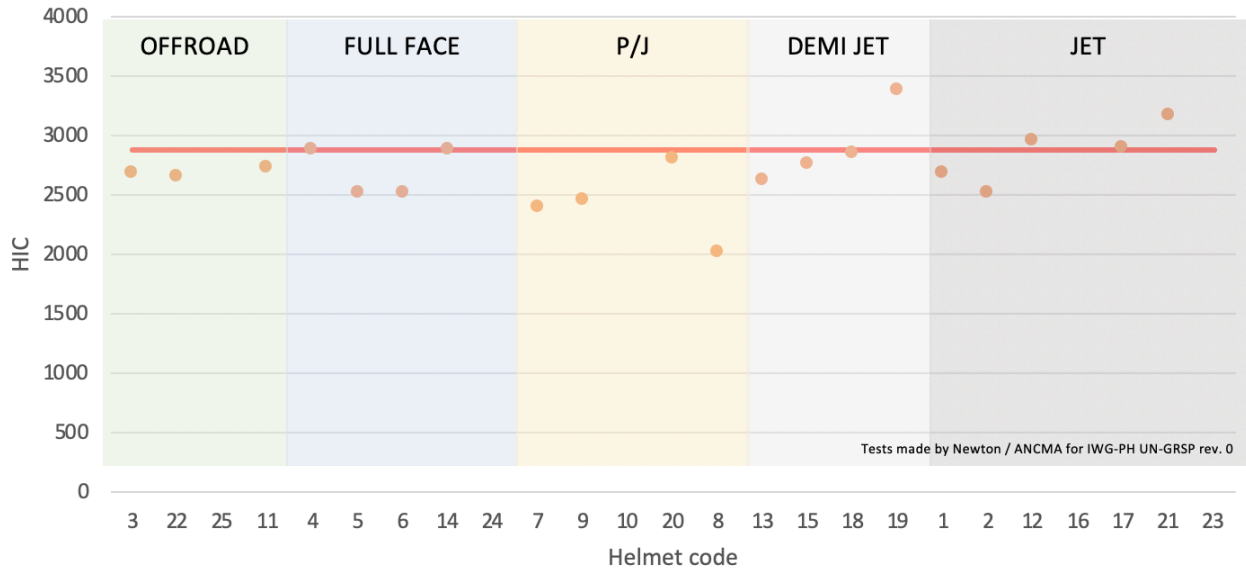

Up today n. 26 helmet models had been tested.

For each model at least n. 4 helmets had been tested by the lab for different purposes.

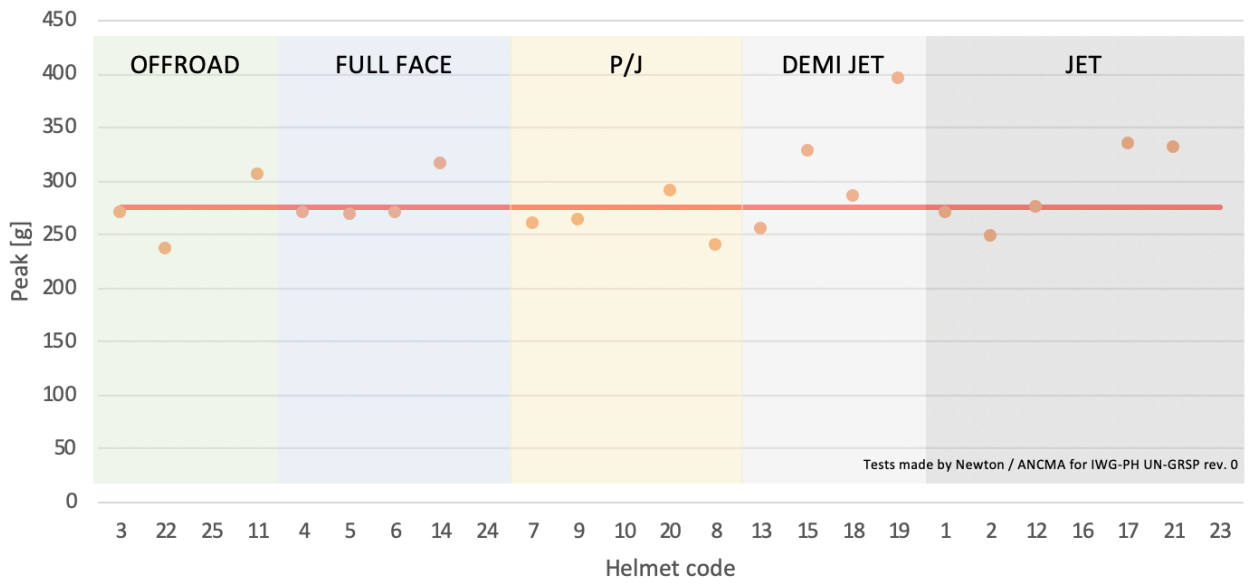

More data will follow.

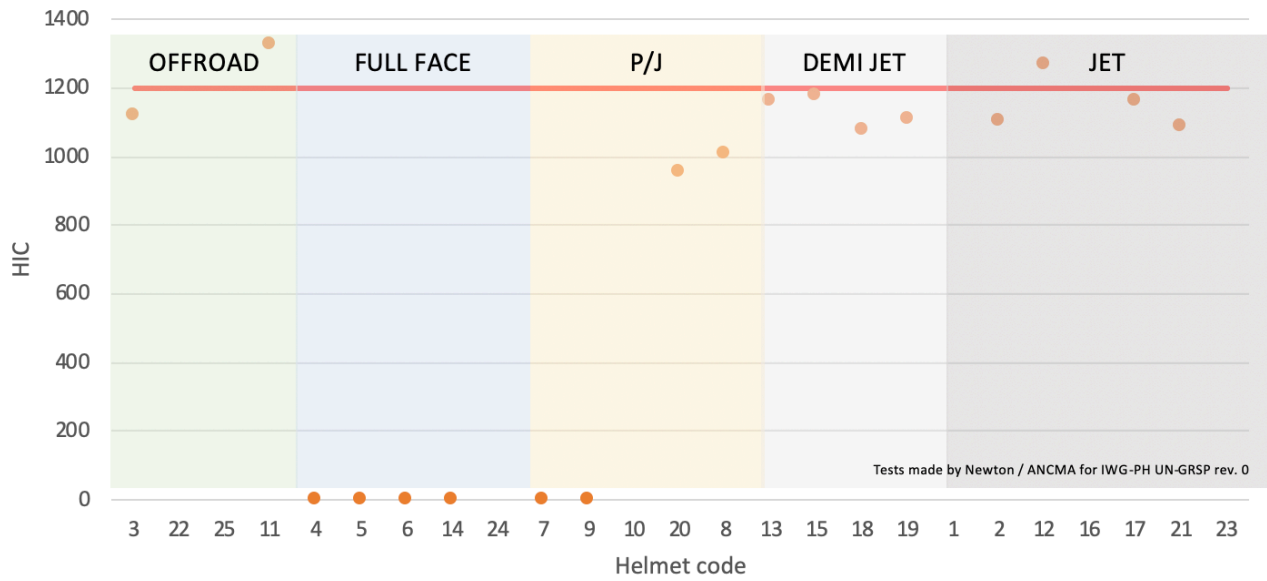

High speed impact - HIC

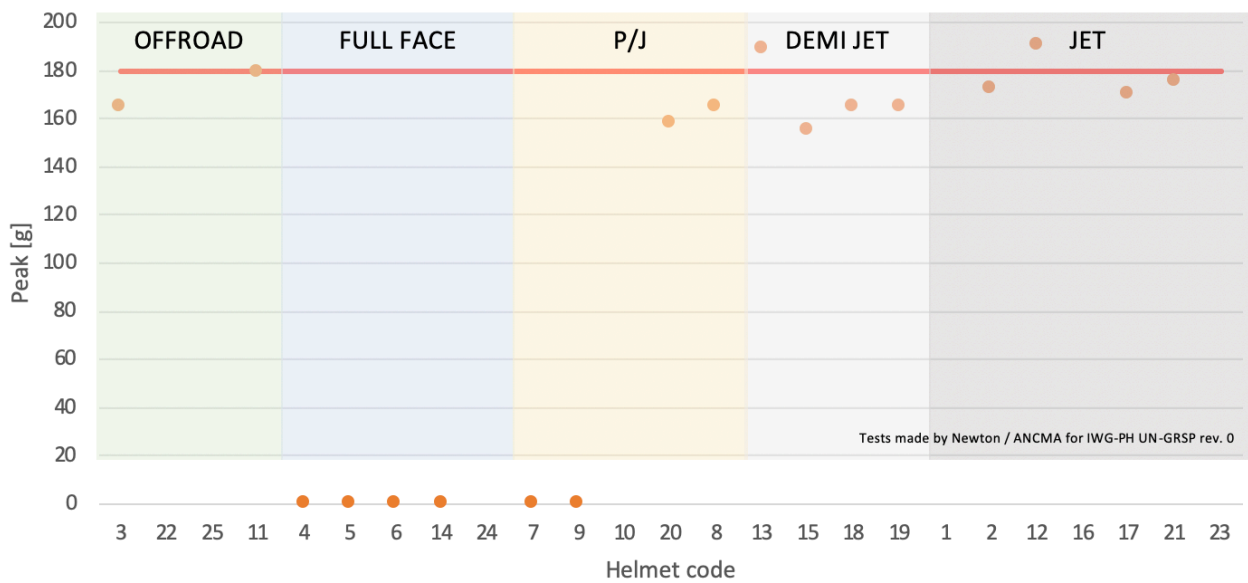

High speed impact - PEAK

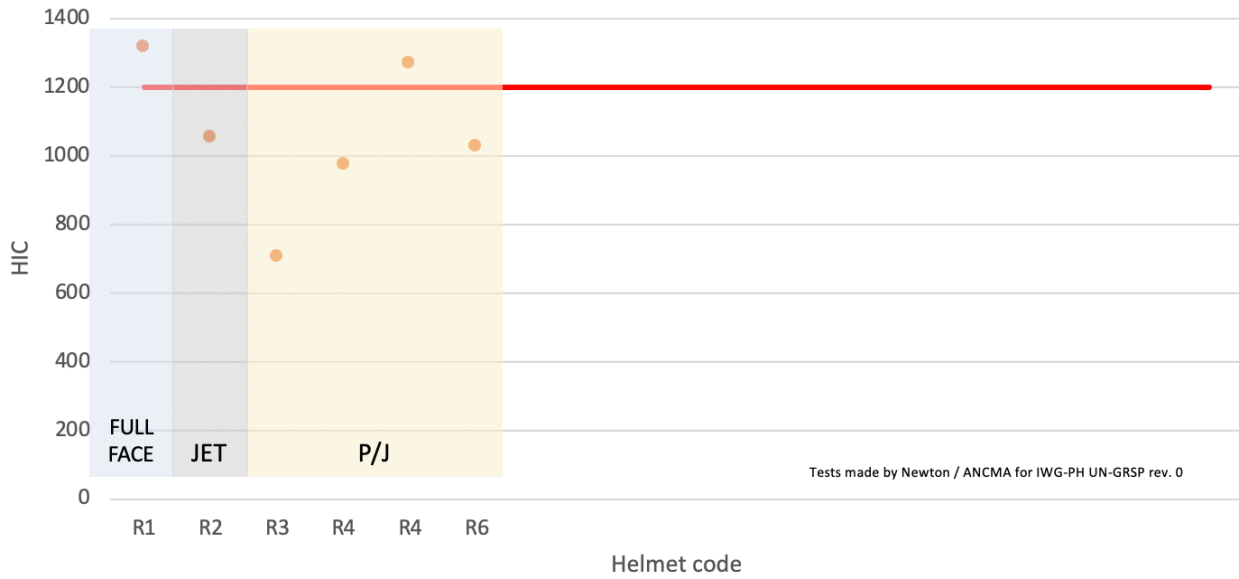

Low speed impact - HIC

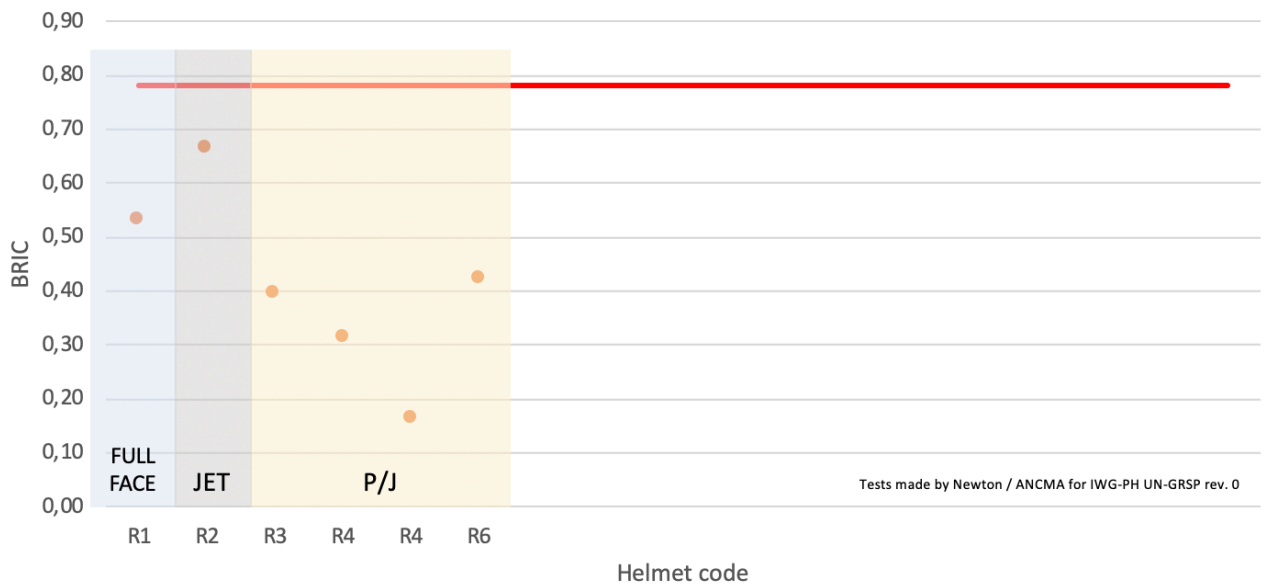

Low speed impact - PEAK

Rotational acceleration - HIC

Rotational acceleration - BRIC

Rotational acceleration - PRA
