

SLR-24-04

GTBWGSL363

Simplification stage II

GTB INPUT TO SLR - 25.05.2018

Light Signalling Devices (LSD)

Main topics to be worked on in future

- light source module definition §4.3.2.ff
- failure provisions (harmonisation) §4.6. (see also §5.4.4.ff)
- stabilisation §4.8.2.3.ff
- wording ambiguous (lamps vs. Samples?) §5.x.1.
- move text to definition section (§4.x.) §5.10.2.(a)
- more items to be identified for Stage II, Step 1

- rear registration plate lamp – harmonisation §5.11.
- reversing lamp – improvement §5.8.
- rear fog lamp – improvement §5.9.
- Additional functions §x.y.

Retro Reflective Devices (RRD)

Main topics to be worked on in future

- Requirements for CIL for retroreflective devices – classes
- Requirements for R' (RA) for retroreflective devices/markings – classes
- Colorimetric requirements – daytime and nighttime visibility enhanced visibility
- Photometric measurement conditions – to define independent from device
- Water-penetration test and corrosion test independent from the device
- Weathering test (colour fastness) to adapt to state of the art testing
- Mechanical requirements to define testing independent from device
- Chemical and environmental requirements - testing independent from device
- Specific requirements and testing, which is depending from the device
