All official proposals have been adopted as amended by the SLR informal documents

- Only GRE/2018/11 (about TPs) was adopted with square brackets around the 3rd paragraph (as requested by EC). This document will be addressed at SLR-24 along with GRE-79-31 and SLR-24-02.

- In GRE-79-13, under A.III section, the "alternative text" in square brackets for Par. 6.3.9. was adopted

In addition to the amendments introduced with the SLR informal documents, GRE/2018/03 (RID) was adopted with the following correction:

5.6. Technical requirements concerning cornering lamps (symbol K)

5.6.1. Intensity of light emitted

5.6.1.1. For the left-hand device, the minimum intensity of the light at the specified measuring points shall be as follows:

a) 2.5D – 30L: 240 cd
b) 2.5D – 45L: 400 cd
c) 2.5D – 60L: 240 cd

The same values apply symmetrically for a right-hand device. (Shown in Annex 4 Figure A4-XII)

But Annex 4 figure A4-XII is not on line with the requirements. The horizontal angles in the figures are 60° 45° and 15° 30°. This shall be 30°
