Norway comments on new drafts UN Regulation on the approval of motor vehicles with regard to their Advanced Emergency Braking System (AEBS)

Question 1.

Relates to M1 and N1 who have access to a trailer. Will the AEBS system record additional weight on the trailer.

In addition, will there be a Yellow warning in INS to information to the driver due to missing of ABS on the trailer, as we got when we connect a trailer on a truck from N2 and N3 group of a towing car.
