

# OICA input to the 3<sup>rd</sup> meeting of the IWG-RDE

OICA is setting up an industry technical expert group to support the work of IWG-RDE:

- Assist with developing technical aspects of the GTR. Examples include:
  - Background to the cumulative positive altitude gain
  - Accounting for PEMS measurement uncertainty
  - Accommodating non-WLTC based cycles
- Provide technical insight and experience of developing and certifying vehicles for RDE (in particular EU-RDE)

3<sup>rd</sup> Meeting of the IWG-RDE:

- OICA suggests identifying key work-streams and a roadmap for each during the 3<sup>rd</sup> meeting of the IWG-RDE
